

Nature Scavenger Hunt

Icon Key	
	Talk about it with your group

Count how many times you pass a stone wall.

Catch some insects!

What is different about the bugs you caught? What is the same?

Look for signs of animal activity

Clues to look for: feathers, holes in trees or ground, plants that have been bitten, nests, and tracks

**Can you find
any of these plants?**

Fern

Lichen

Princess Pine

Moss

Touch some moss.

How does it feel? Where do you see moss growing? What do you think it needs to live?

Find an acorn.

What is an acorn? Can you think of any animals that eat acorns? What would happen if we buried the acorn in the dirt?

Look up at the trees.

Observe the trees in the woods and fill out the "If I were a Tree" worksheet after the scavenger hunt.
